## ABOUT ME

Front-End Web Developer with several technical skills that have been acquired over more than a year studying self-taught and full-time who considers constant formation as something important either becoming more familiar with technologies already known or learning new ones that are necessary. All this to deliver outstanding quality work and be prepared at all times for any need.

## TECHNICAL AND SOFT SKILLS

**Languages** HTML, CSS, JavaScript (ES6), TypeScript.

**Libraries** React.js, Redux, React Router.

**CSS Preprocessors** SASS/SCSS.

**Tools** Git, GitHub, NPM, Terminal.

**Soft skills** Responsibility, honesty, punctuality, organization and teamwork.

## EXPERIENCE

**Audiophile** E-commerce to buy audio items such as headphones and speakers. The site consumes a JSON that includes all the information about each product. (HTML, CSS, JavaScript, TypeScript, React, Redux, SASS/SCSS)

**YelpCamp** Platform to publish camps in tourist places with the possibility of creating users, giving reviews about camps and much more. (HTML, CSS, JavaScript, Moment.js, React, React Router, Redux, SASS/SCSS)

**DoggoApp** Application that consumes an API to obtain information on hundreds of dog breeds. Includes a searchbar and pagination for a better UX. (HTML, CSS, JavaScript, TypeScript, React, Context API, SASS/SCSS)

**MyFavoritePlace** Application where a map is displayed with the option to locate the user using geolocation to add markers of some favorite places. (HTML, CSS, JavaScript, React, Leaflet, SASS/SCSS)

**CountriesApp** Application that consumes an API to obtain information of countries such as population, currency, neighboring countries, etc. It includes a searchbar and a theme changer. (HTML, CSS, JavaScript, React, Context API, SASS/SCSS)

**Memory Game** Memory game to play up to four players with easy and hard difficulty and the option to choose to find the pairs of icons or numbers. (HTML, CSS, JavaScript, React, Context API, Redux, FontAwesome, SASS/SCSS)

**Tip Calculator** Calculator to obtain the amount of money to leave as a tip based on the desired percentage, total bill and number of persons in a restaurant. (HTML, CSS, JavaScript, React, Context API, SASS/SCSS)

(All the details about each project as well as a link to the repository and live demo can be found in the portfolio)

## PORTFOLIO

**Personal portfolio** christianramirezlara.com
